

Specific life cycle assessment Lindner Raised Floor Pedestal H2 150 mm

A life cycle assessment (LCA) in accordance with ISO 14025 and DIN EN 15804+A2 is available for the Raised Floor Pedestal H2 150 mm, from which data for the building life cycle balance can be taken. The declared unit of this life cycle assessment is 1 m² of raised floor.

The CO₂ figures calculated below refer to steel pedestals, determined using a life cycle assessment software. The end-of-life (EoL) scenarios considered are: Scenario 1: 95% Recycling 5% landfill

Produkt und Technische Daten Product and Technical data	deklarierte Einheit (m ²) declared unit (m ²)	Spezifisches Gesamtgewicht Produkt (kg/m ²) Specific total weight product (kg/m ²)	Dichte (kg/m3) Density (kg/m3)
Raised Floor Pedestal H2 150 mm	1.00	2.14	7850.00
